

The knowledge, without know how, is totally useless (M. Plank)

OUR STORY...

In 1975 I founded with my partner the Frigotermica Company; today I'm here to present our 37 years of experience in the Design, Manufacture, Supply, Installation and Commissioning / start-up of HVAC Systems.

Our story

From 1975 to 1985

Expression of tradition, Frigotermica was born in 1975.

The Company is managed to get into in realization of air conditioning systems and manufacture of special components needed to single customers, meeting a good success.

Our story

From 1985 to 1995

In the eighties, after the acquisition more experience in the Oil & Gas field and in the chemical industry, Frigotermica manages to win several contracts in these areas.

Always looking for new challenges, Frigotermica begins to study and to produce standard products such refrigeration unit, electrical control panels, air handling unit.

In 1982 Frigotermica goes beyond national borders to expand its market in Europe and Africa.

Our story

From 1995 to 2005

In 1996 Frigotermica obtains the UNI-EN-ISO 9001 (ISO 9001:94), which since then it has never left the company.

In the nineties our purpose was to internationalize our business increasingly, to bring our italian product in South East Asia, Black Africa and Middle East.

So we have established company Frigotermica Nigeria which it is specialized in services for local Oil & Gas service companies

After 2000 with the arrival of new generations, we were able to further improve our society.

Our story

From 2005 'til Today

With the assistance of skilled technicians, young men introduced in the engineering dept., Frigotermica has been able to increase the customers and to improve the quality of the final product.

This new expansion has allowed the division of Frigotermica in four departments listed below, each with its own manager:

- COMMERCIAL Department
- ENGINEERING Department
- MACHINERY Department
- ELECTRICAL CONTROL PANELS Department

Commercial Department

This dept., which I chair, maintains relationships with all customers.

It routes the Engineering Dept., for the works acquisition.

It supervises the qualification internal procedure with the customer.

It issues the economic and technical offers for submission to various customers.

It talks over the economically and technically deals with different customers

It receives and assigns the various construction contracts to the most qualified technicians.

Engineering Department

This dept. takes charge of:

- Develop the engineering details of each Job Order;
- Discuss technically the project with customer engineers;
- Realize offers request offers to all sub-suppliers

- Plan with the Machinery dept. the realization of each units;
- Receipt, Check, Tests with the customer and Pack the contract material;
- Draw up the Final Documentation.

Machinery Department

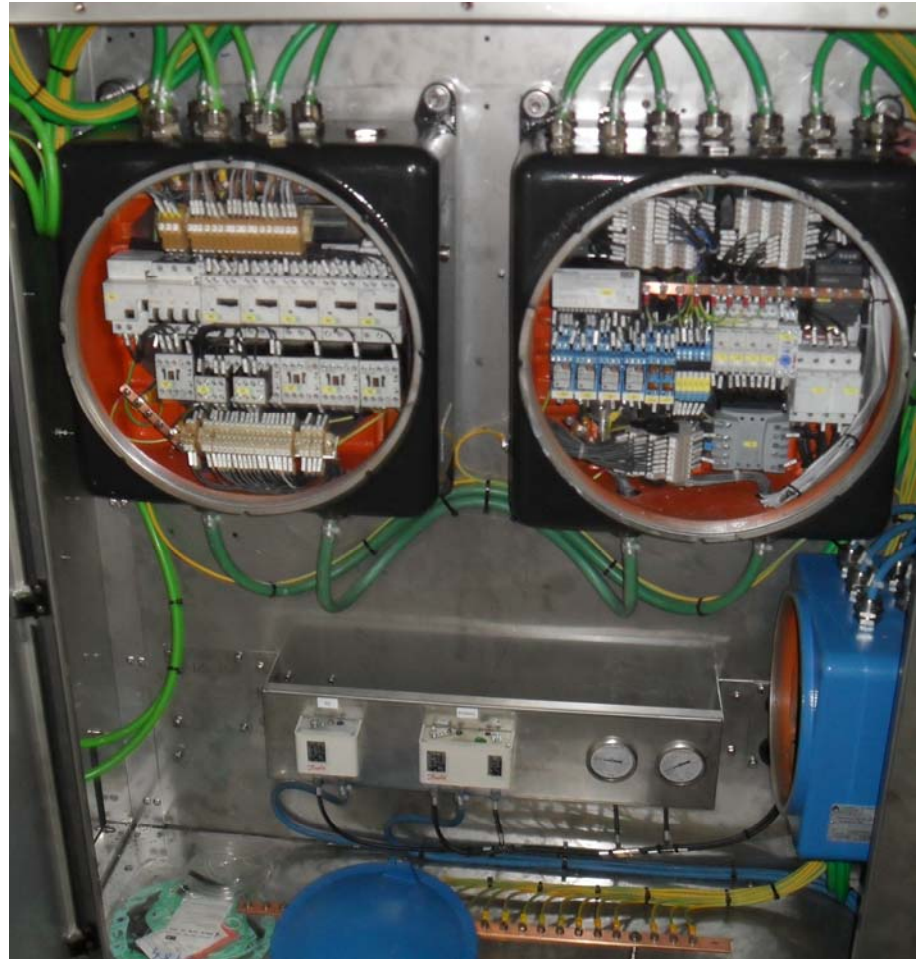

This dept. takes charge of:

- Study and realize with engineering each units;
- Edit all customers required documents;
- Serch the materials according with customers specification;
